

# Mobile Bay Oyster Gardening Program

## Growth Monitoring Form

Randomly select and measure in millimeters 25 to 50 oysters using the calipers provided. Measurements are taken from the hinge to the lip (see red arrows below). The more you measure, the better the accuracy.

You can record your data on in the table on the next page. Data submission can be done by mail, fax, or e mail (see below for contact info). If you have any questions don't hesitate to call. The more often you measure the better your curve will be for your area.

## DATA SUBMISSION OPTIONS

E mail : [waterph@aces.edu](mailto:waterph@aces.edu)

Fax: 251.438.5670

Mail: 4170 Commanders Drive Mobile, AL 36615 Attn: Oyster Gardening

- **Make sure you include your name, date and location (CR1, Ft. Morgan, DIP, Dauphin Island)**
